

NWEBG 2025 NW Green Building Slam Sponsorships

Learn about 10 innovative, sustainable, high-performance “green” buildings that push the envelope in our built environment. Projects range from residential to multi-family to mixed-use developments in the PNW.

Each of our juried 10 presenters will have just 10 minutes to show us 10 slides of their exciting project as they explain what they learned, what they would do differently, and any other sustainable contributions their project has made to our local community.

The Slam audience typically attracts architects, builders, homeowners, energy efficiency experts, real estate professionals, interior designers and fabulous, eco-conscious people like you.
